

# Requirement and Analysis

---

- **Existing system**

- All criminal records are stored in a file.
- To add any record, record file is used.
- When other police station requires any criminal information at that time they need to call that police station.
- There are many drawbacks like time consuming, require more man power.

- **Proposed system**

- Citizens not need to go police station to see criminals information.
- They can directly see information on site.
- Reduced man power.
- Less time consuming.
- Member can view the current status of the crime investigation.

- **Required system**

- Xampp server
- Composer for install laravel
- Sublime text 3 editor
